

# Transport Analysis Report (Synthetic Data)

Generated with RANDOM\_SEED=2025

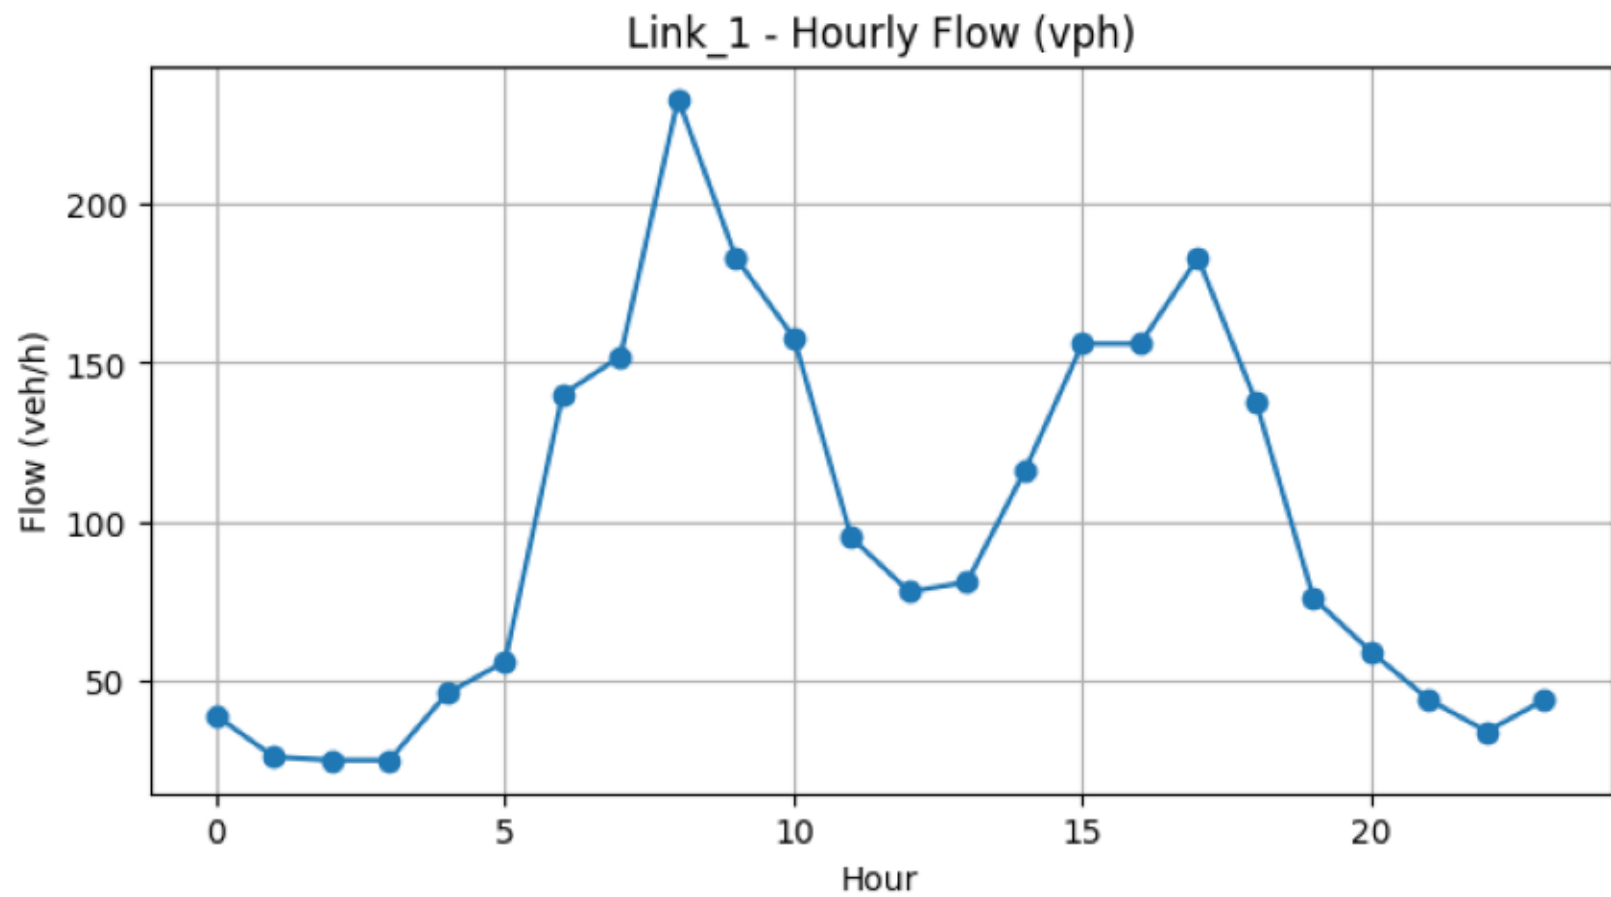

## Study description:

Corridor with 3 links. Synthetic hourly counts generated via Poisson sampling. Speeds estimated with Greenshields model. Queue delays estimated via M/M/1 approximation. This report contains time-series plots and tables.

Link\_1: peak hour = 8, peak flow = 233 veh/h

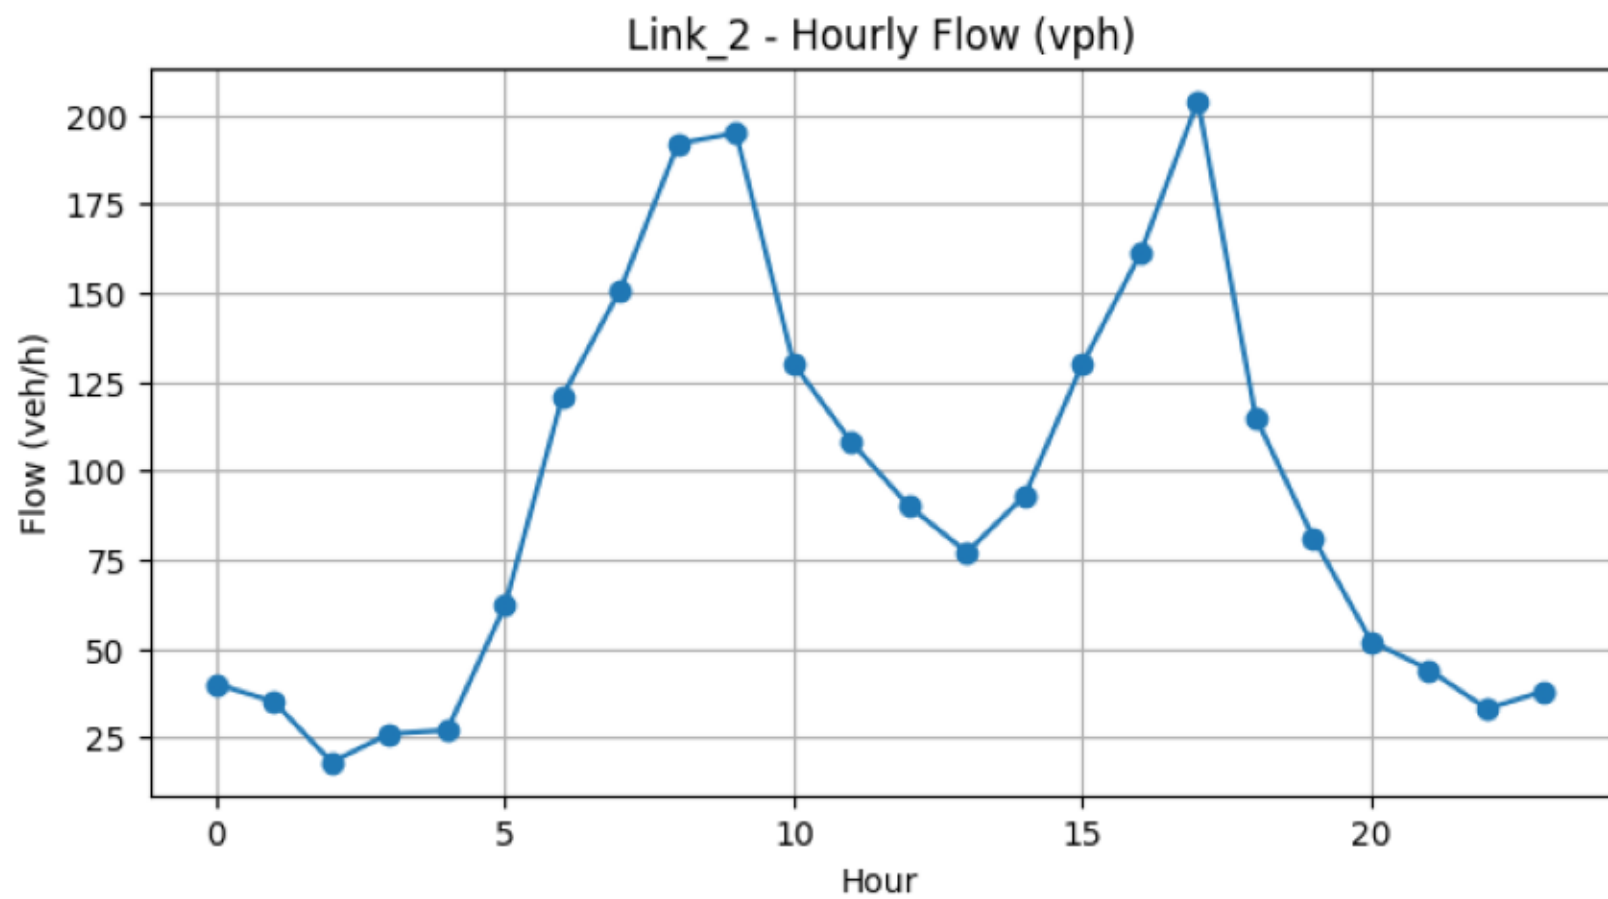

Link\_2: peak hour = 17, peak flow = 204 veh/h

Link\_3: peak hour = 17, peak flow = 267 veh/h

Link\_1 - Estimated Speed (kph) via Greenshields

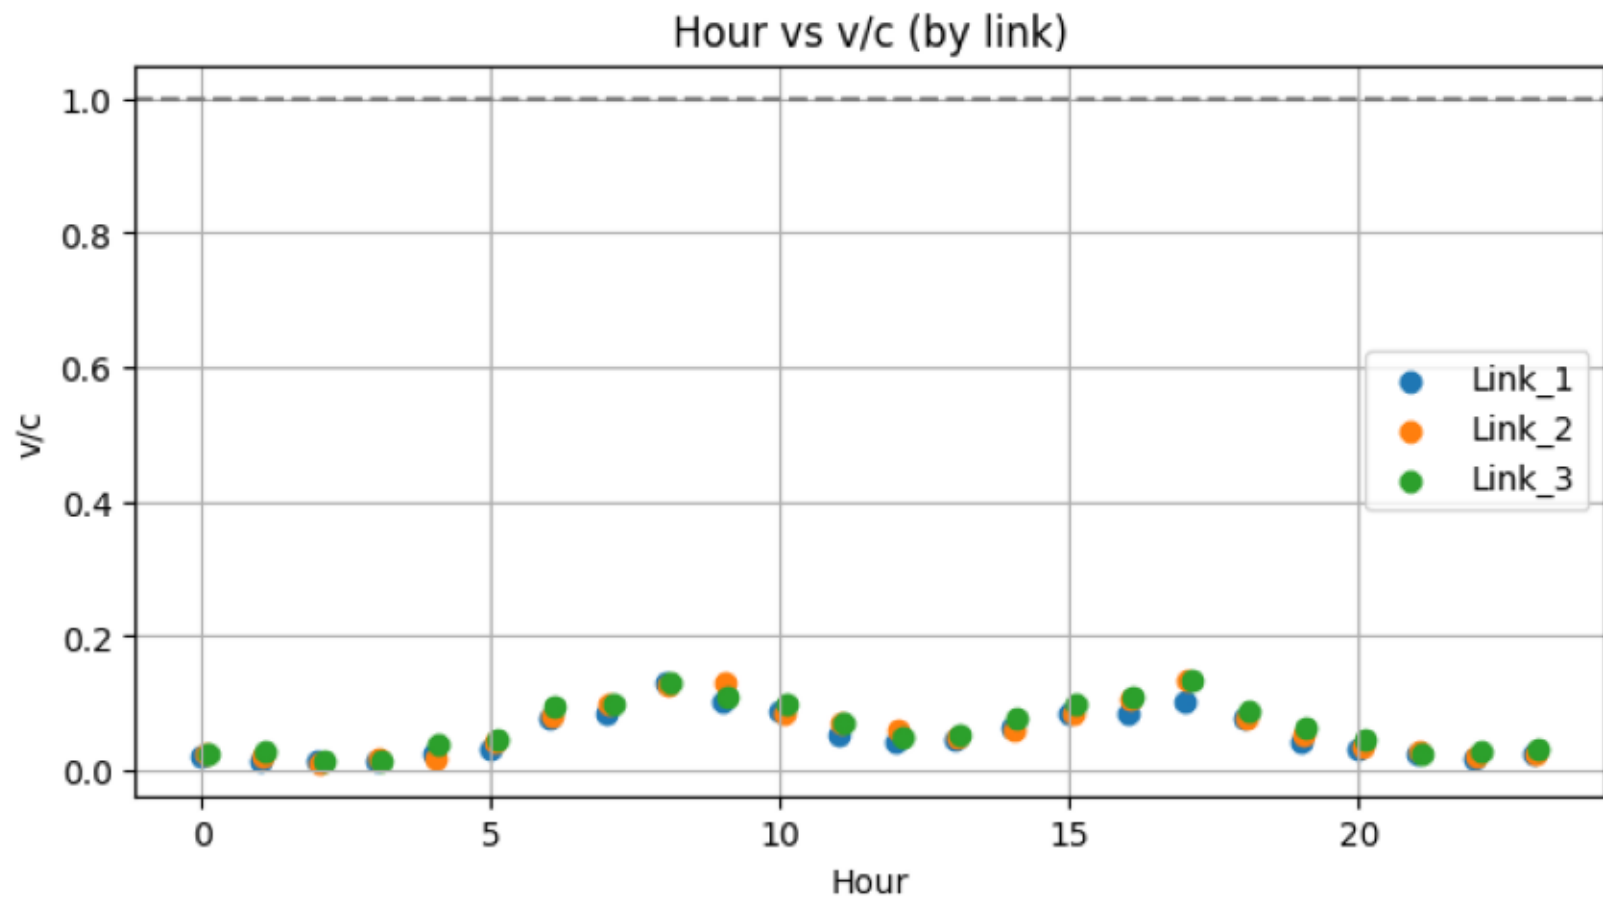

Link\_2 - Estimated Speed (kph) via Greenshields

Link\_3 - Estimated Speed (kph) via Greenshields

Sample of Analysis Table (first 10 rows)

| link   | hour | flow_vph | density_veh_per_km | speed_kph | v_by_c | queue_delay_min | travel_time_min | LOS |
|--------|------|----------|--------------------|-----------|--------|-----------------|-----------------|-----|
| Link_1 | 0    | 39       | 0.65               | 59.74     | 0.02   | 0.0             | 1.21            | A   |
